1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

I. Claims 1-9 are, drawn to a carry/majority circuit, classified in class 708, subclass 700.

II. Claims 10-16 are, drawn an accumulator architecture, classified in class 708, subclass 490.

III. Claims 17-20 are, drawn a direct digital synthesizer, classified in class 708, subclass 271.

2. The inventions are distinct, each from the other because:

The inventions listed as Groups I, II and III do not relate to a single general inventive concept because they lack the same or corresponding special technical features for the following reasons: Inventions of Group I and II recite as different combinations which are not connected either design, operation or effect.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2193

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
